

# CASE STUDY YACHT

## 45m Hakvoort - Milele

### BRIEF

This compact high performance vessel was a ground-breaking achievement for Hakvoort and their first Hybrid powered yacht.

Systems installed were kept simple by design, but we were asked to incorporate an outdoor "Cinema"

### RESPONSE

The yacht's AV/IT infrastructure was managed from a single technical space using two full height equipment racks.

The Cinema was an ingenious solution using the underside of the hydraulic hatch covering the yacht's rescue tender.

This project also saw one of our first "Starlink" installations, coupled with an innovative 5G Dome for redundancy and high speed out-of-band internet coverage.

### TECHNOLOGIES

- ◆ Crestron NVX
- ◆ QSC Q-Sys
- ◆ Outdoor Cinema
- ◆ Crestron Control
