

CASE STUDY YACHT

90M Corsair - M/Y Nero

BRIEF

Full Audio Video, IT and CCTV Systems upgrade in a 6 month re-fit. Yacht was seriously damaged in a docking accident and required extensive re-cabling prior to a full systems replacement.

RESPONSE

As with all re-fits, our solutions needed to work within existing space and equipment locations. We opted for new sliding equipment racks for all local room installations enabling us to effectively build, program and test the entire system in the workshop whilst interior works continued on-board.

Systems included:

- ◆ Kaleidescape Media Server
- ◆ Crestron NVX 4K Video
- ◆ Q-Sys Network Audio distribution
- ◆ Vessel Watch DMR Radio Integration
- ◆ Cinema Upgrade
- ◆ Icon Connect Control system and management tools
- ◆ CCTV System
- ◆ IT Network and Connectivity
